IT'S EASY to CONTROL WEEDS in TOBACCO BEDS with GRANULAR 'AERO' CYANAMID

THIS IS ALL YOU DO—

1. **Select a good plant bed location and clear it of all weeds and trash.**
2. **Prepare a fine, clod-free seed bed.**
   In cloddy, poorly-prepared soil many weed seeds are likely to escape being killed.
3. **Broadcast Granular 'Aero' Cyanamid evenly at the recommended rate.**
   For average tobacco soils 1 pound per square yard.
   For light, sandy soils ½ to ¾ pound per square yard.
   For heavier soils 1½ to 2 pounds per square yard.
4. **Mix the Cyanamid thoroughly with the top four inches of soil.**
   Do it any way you want to—light discing, harrowing, or raking—but mix it thoroughly.

N. B. This job must be done in the fall, 60 to 90 days or more before time to seed tobacco.

NO NEED FOR STEAMING OR BURNING—NO HAND-WEEDING!!

Prompt Help For A Listless Child

Scolding won't help a boy or girl who is listless, dull or cross from constipation. But, here's something that will!

If sluggish bowels have your child headachy, bilious, upset, give him a little Syrup of Black-Draught tonight. Like the original famed BLACK-DRAUGHT, its principal ingredient is an intestinal tonic-laxative. Helps impart tone to the bowel muscles.

Children like the taste of Syrup of Black-Draught. It is an all vegetable product. When simple directions are followed, its action is gentle, but prompt and complete. Comes in two sizes: 50c and 25c.

ELECTRIC RATES DOWN AGAIN

Second Reduction This Year

ON October 1, as promised, the cost of electric service will be reduced in Virginia for the second time in 1939. This is the eighth step taken by the Virginia Public Service Company in the last five years to give you low cost electricity.

The Two Reductions in 1939 Mean a Saving to Customers of Over $350,000.

The following simple table shows savings over 1938 costs:

Monthly KWH Used	1938 Rate	New Rate 10/1/39	Per Cent Savings
15	$1.35	$1.05	11%
35	1.70	1.35	126%
60	2.00	1.55	14.5%
100	2.32	1.84	8%
250	5.63	3.38	6%

These reductions are part of the Company's program of giving the public the benefit of lower cost electricity whenever possible. During the past five years the eight reductions that were made resulted in decreased cost of domestic electric service of 26%.

Rate reductions result primarily from a combination of increased use on the part of consumers and greater operating efficiency on the part of the Company. If use continues to increase and if nothing unforeseen occurs, such as a sudden rise in costs, to interfere with the Company's operation, we are confident that our rate reduction policy can be successfully continued.
